

Emir Ozdemir

SOFTWARE ENGINEERING
STUDENT

ABOUT

I am an ambitious and skilled all-round developer with a lot of technical knowledge about various applications, languages and systems. In addition, I am social and find it a challenge to achieve goals in a team environment. Qualities that belong to me are; accurate, stress resistant, responsible and perseverance.

LANGUAGES

PERSONAL SKILLS

Leadership
Critical Thinker
Problem Solving
Creative

PERSONAL PROJECTS

Coding App

2022 June - Present

I am currently building a MERN-stack application with which I actually want to show my capabilities because I have no work experience and also help young student programmers with their studies.

The application provides different types of programming exercises of different difficulty levels for different audiences such as high school, college and university. These can then be solved in a built-in browser IDE.

In addition, users can solve quizzes and take courses written by fellow students.

TECHNICAL SKILLS

Frontend

React, Vue.js, Flutter, Angular, Html, Css, Javascript

Backend

Node.js, Java, Sprint Boot, ASP.NET Core, PHP, REST Web Services, Laravel

Other

MongoDB, SQL, Docker, Linux, Jenkins, Devops, Jira, Confluence, Azure

EDUCATION

2020 - 2023

Bachelor in Application Development

PXL University of Applied Sciences and Arts

2013-2019

Accountancy & IT

Sint-Franciscus College
